**On the Present State of the System
of Continuing Education in the Business Sphere**

Annotation

The system of continuing education concerning the postgraduate raising of qualification in the field of production and business is considered in the article. It is demonstrated that in the absence of systemic state solutions and in the case of the withdrawal of the government from the system of advanced training, the state system of improvement of qualification and staff training weakens. However, the corporate training system gets its independent development. The necessity of interaction of corporate training with the system of vocational education is substantiated and the forms and paths of effective interaction are presented.

Keywords: staff advanced training in the field of production and business, system of vocational education, continuing education.
